Product **Description**

The PS600X is a high brightness XGA short throw projector for education. With the ability to project 100" images from a distance of 124cm from the projection surface, PS600X is flexible enough to fit any classroom design while keeping the presenter clear of the projection beam. A brightness of 3700 ANSI Lumens allows the projector to project clear, detailed images with the lights kept on so students can more easily take notes and maintain focus. The energy-saving SuperEco mode reduces power consumption and extends lamp life to a lengthy 15,000 hours. PS600X is compatible with PJ-vTouch-10S, the optional interactive module that turns class into an engaging interactive teaching environment. In addition, users can easily control and manage PS600X remotely via the LAN network solution for maximum efficiency.
